

Jan. 19 - 1881

Albion of
White Book

He spent the
Conference and
unpublished
before the
Genes

Kenn

Jan. 13th /61/. Hectas in question - as seen in
Legum. & Land - see also Kun for the
cases - In Brecken & flowers later than of
when the skin - sugar is highly oxidized,
& is not oxygenated when the skin -
hectas is in the case of the insect -
C. C. Spreng. has said that it is
in various part of organs within
flowers & it is very present in highly
oxidized plants (see Kun) which of which
are to plant for collecting insects -
He ended in saying that there must
be for self-fertilization; things in many
cases necessary for self-fertilization } & for
union of Division plants & The red spots
as there is may present consideration
in the various secondary cases -
But he said in the Kun, as Papaver &

(6) ^{beastly} plant we self-fertilizing itself
+ thus arising with spang,
is a fact for you, I am glad of
copying

& Vester (Kurt) no matter, get them some
whisky up - I must get them some to go -
But the one as before - in
place of which must be seen to feed - but
wind both winter division & up to
hemorrhoids - often have gotten into
no short of the in abundance - saying after
from what flower is - & no matter (can
be. expecta pph.)

That of water of fruit which feed chief in
matter !

Key 129

133 v to color

Delphian

99 bit of Plant without nectar
102 nectar very scented before pollen shed
but lost afterwards

115 Case of nectar scented outside of flower
(from at base of my cases)

124 Cases of Odor. which not in seed then
spurs at it -- but spirit cases seem in

note
126. Vides to the base seed when 11/2 in cut the
plant been so not seen to any part of

flower -- 10 with Cryptid. later
129 several conclusions for 441 experiments body

leaving seed

131. 10m nectar base fruit when corolla cut off
133 v. to the base fruit 135 several conclusions

that cutting off corolla 22 not present flower
producing fruit.!

135 several conclusions of whole Book on

142. use of nectar -- all still & use
Means of use of Copper.

Abstract of Venn on Medusa Jan 14 1881

- June 17
